

# Wi-Fi Top 20 Checklist

Site \_\_\_\_\_

Date \_\_\_\_ / \_\_\_\_ / \_\_\_\_

Checklist to be used to quickly evaluate a Wi-Fi installation to a level of best practices. There will ALWAYS be situations where different metrics should be used. Please update green boxes for variable metrics for your specific requirements - Enter a 1 in the box for each item if it meets requirements, and a 0 if it does not.

## Notes

\*\*\* - indicates some discussion in the community

Positive Response or should be turned ON

Not Required or should be turned OFF

This category may use a variable for the metric

Metric used to measure this category - should be discussed and planned to meet site requirements

| Items to Review and Report |                                     |  | 2.4GHz                  | 5GHz             | 6GHz                   |
|----------------------------|-------------------------------------|--|-------------------------|------------------|------------------------|
| 1                          | Captive Web Portal Use              |  | Use only if required    |                  | Use only if required   |
| 2                          | 1, 6, 11 Only                       |  | Ch 1, 6, 11 Only        |                  | Not Applicable in 6GHz |
| 3                          | 20 MHz Channels                     |  | 20MHz Channels Only     |                  | Use                    |
| 4                          | 40 MHz Channels                     |  | No 40MHz Ch             |                  | Use                    |
| 5                          | 80 MHz Channels                     |  | Not Available in 2.4GHz |                  | Check CCC              |
| 6                          | Interference - Co-Channel           |  | >-85dBm                 |                  | >-85dBm                |
| 7                          | OBSS - Consistent Channel Bonding   |  | Do NOT bond channels!   |                  | High Side Consistent   |
| 8                          | Channels - DFS in Use               |  | Not Applicable          |                  | Use & Review           |
| 9                          | Minimum Basic Rates - Trim          |  | MBR>=12Mbps, No b       |                  | MBR>=12Mbps            |
| 10                         | SSID's - Across Bands               |  | Have 2.4GHz-only SSIDs  |                  | Use w/RNR              |
| 11                         | Signal - Primary RSSI               |  | -67dBm                  |                  | -65dBm                 |
| 12                         | Signal - Secondary RSSI ***         |  | -67dBm                  |                  | -65dBm                 |
